

FUELMATE

Fuel Oil Additive

8171

DESCRIPTION

FUELMATE is designed for removal of excess water from fuel oil with an inbuilt biocide to deal with associated biological fouling.

PRODUCT BENEFITS

- Ensures better atomization and more regular combustion.
- Reduces the frequency of filter cleaning, prevents the clogging of burners
- Rapidly breaks water emulsions in the oil enabling removal of this contaminant from storage tanks.
- Eliminates biological growth in any water contained in the oil and thus preventing any biological fouling.

PHYSICAL PROPERTIES

Appearance	Liquid
Colour	Pale Amber
Odour	Solvent
Specific Gravity @ 20°C	0.885 - 0.890
Flash Point (ASTM D56-16a)	28°C

DIRECTIONS FOR USE

Add **FUELMATE** to the oil in the storage tank in the proportion of 1 L in each 3,000 L of oil. Maintain this concentration in the tank by adding the required amount as often as more oil is added to the tank. Badly sludge tanks should be dosed at triple strength until the sludge has been converted to usable oil. Any water separated will remain in the bottom of the tank. Any water accumulated through the action of the demulsifier **FUELMATE** will remain free of biological growth until drained or pump away from the tanks.

STORAGE & SAFETY

If swallowed, rinse mouth thoroughly with water. Give plenty of water to drink if conscious. DO NOT induce vomiting because of risk of aspiration. Seek medical advice immediately.

If contact with the eyes; promptly flush affected areas with water for at least 15 minutes. Seek medical attention if effects persist.

If contact with the skin; flush affected areas with copious amount of water immediately. Remove contaminated clothing and launder before reuse. Seek medical attention if effects persist.

For further information please refer to the Safety Data Sheet.
